

# FREE 3D BOX GENERATOR

## » QUICK GUIDE

1

After downloading and unzipping folder “**Artbees 3D box generator**” you have 2 types of file.

1. Artbees 3D box generator.psd    2. Go 3D.atn

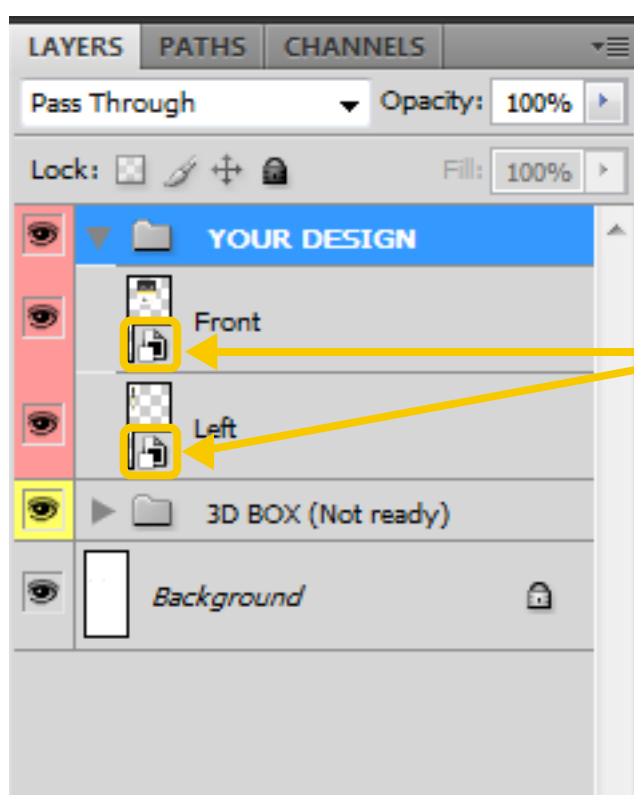

2

Now drag both files ( **Artbees 3D box generator.psd** and **Go 3D.atn** ) into photoshop.

3

In layers panel, there are 2 group folders named “YOUR DESIGN” and “3D BOX (Not ready)”.

Just open “YOUR DESIGN” group folder and click on “smart object” icons inside layer thumbnail.

This is where you should double-click to edit

4

After clicking one of smart object icons, a new document will open up. Now either create or paste your art inside this new document and save (Ctrl+S) and close. Back to your main document repeat this process for other layer.

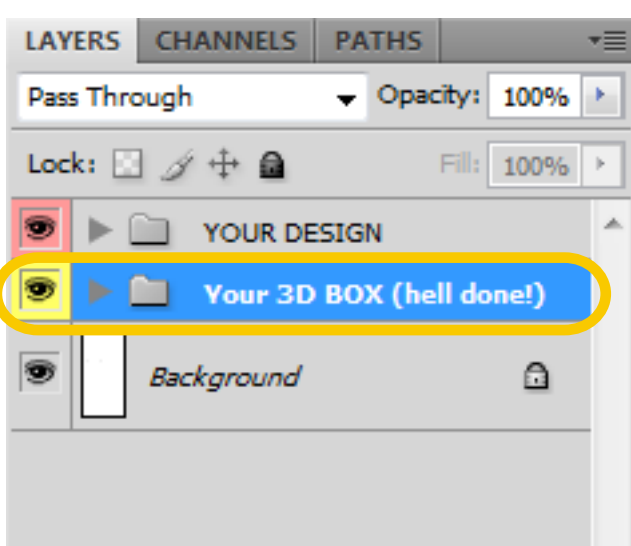

Delete this default layer and Eighther create or paste your own design and then Save.

5

It’s almost done! Now simply press **Ctrl + F10** on your keyboard. The magic runs and your customized 3D box will be ready in seconds!

Now you see a new yellow group named “**Your 3D BOX (hell done!)**” set is created. you can drag it to any image file in Photoshop and use it in your own way.

Have fun :)
