Homizio - <http://www.dafont.com/homizio.font>

What is in the ZIP file:

PSD - Source files for the banners.

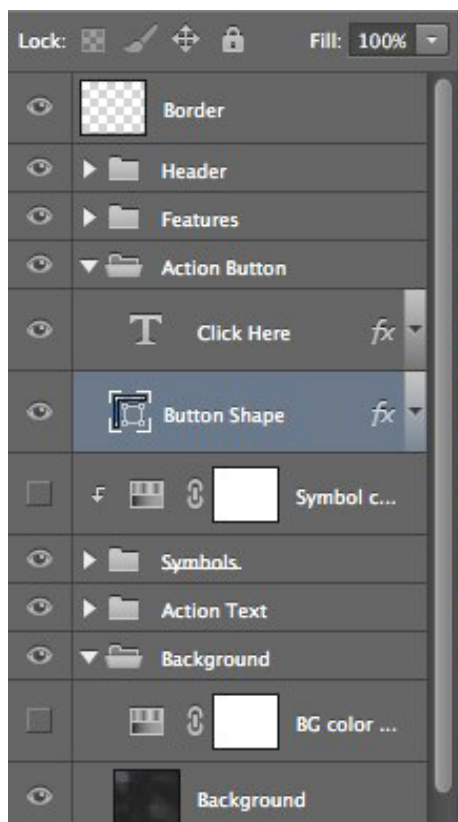

PNG - Exported PNG Files

Gif - Exported animated gif files

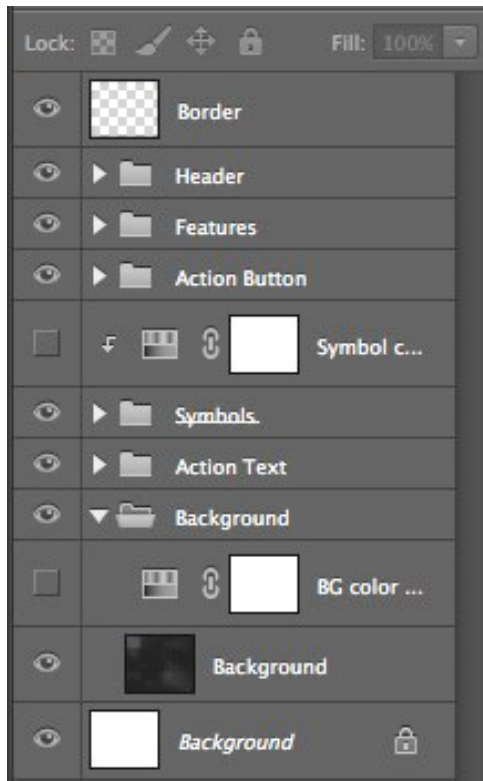

Styles - Additional styles, which you can use to customize the banners.

Customizing colors:

Changing Hue/Saturation will give you an unlimited color choice to customize the banners.

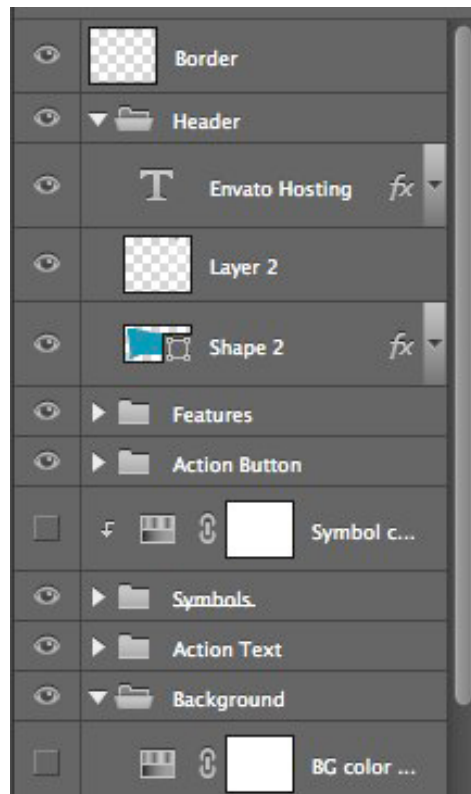

Apply any style from uwb-button.asl to this layer to change the button color. You can also change the blending options to get a unique color without using the given styles.

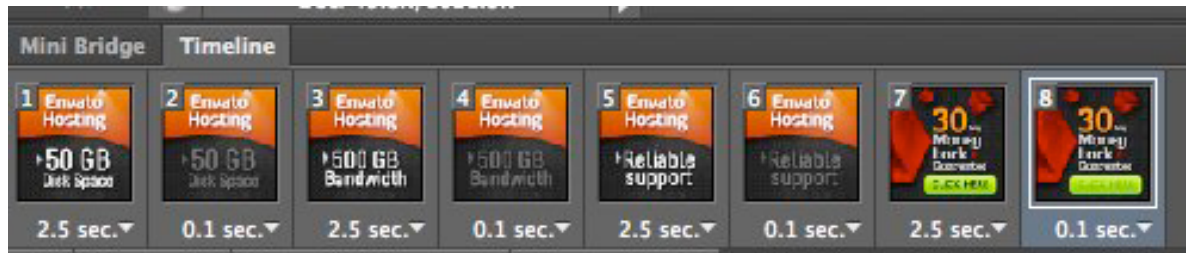

Enable this layer and change the Hue/
Saturation value to get your desired
color the symbols

Enable this layer and change the Hue/
Saturation value to get your desired
color the background

Apply any style from uwb-header.asl
to this layer to change the header
color. You can also change the
gradient in the blending options to get
a unique header color without using
the given styles.

Animations :

When editing the animation you will have to modify each slide on the “Timeline” window.
