CMS pro m2 Upgrade 3.50

In order to upgrade to v3.50, you must have already installed v3.20.
Since most of the files have been modified in order to support new responsive layout
features, please note that all of your files including admin area will be replaced during
upgrade process. However your database will be preserved.

a) After upgrade you will not be able to use your existing templates, due to responsive
structure changes
b) After upgrade you will not be able to use video media in gallery module. This feature has
been removed completely.

1. Backup Your Database

2. Make sure you have full site backup.

3. Unzip full package into your existing CMS pro! directory and overwrite all files except
.htaccess.

4. Open your browser and point to http://yourdomain.com/upgrade.php
where yourdomain.com is the name of your domain. If you've installed CMS pro! In other than
root directory of your domain, than just add your install directory after http://yourdomain.com/
e.g.: http://yourdomain.com/cmsdirectory/upgrade.php

5. Once install completed you'll see the message:
Installation Completed. Please delete upgrade.php
Make sure you delete the file.

WHAT'S NEW?
