

# IMy Stock Image Shop Template Documentation by Santosh Setty

Thank you for purchasing my template. If you have any questions that are beyond the scope of this help file, please feel free to email, via my [user page contact form](#). Thanks so much!

--TABLE OF CONTENTS--

- 1.Theme Installation
- 2.Customizing Files

## Theme Installation

After installation of opencart, and downloading mystockimagestore after purchase you will get these files

1. PSD
2. Opencart Template ( Mystockimagestore )
3. Help

“ (rootfoloder) ? catalog ? view ? theme “ upload mystockimagestore template here, after that you also need to upload screenshot mystockimageshop.png to “{rootfolder} ? image ? templates ”

now login to your admin, after login click on admin ? configuration ? settings , now click on “ shop menu tab “ select template and save it.

Adding Logo : “ click image tab “ upload logo here, thats it.

For adding products and more help <http://www.opencart.com/index.php?route=documentation/introduction>

- A) HTML Structure ( Template Folder )
- B) CSS Files ( stylesheet folder )
- C) Images Folder
- D) PSD Files

---

#header - Header Div

#logo - Logo Div

#menu - Menu bar

#container - Container

#left-col - Left Column

#center-col - Center Column

#right-col - Right Column

#Footer - Footer

.block- Login, Categories, etc.. Box

.block-top - Box Top

.block-bottom - Box Bottom

---

-

## B) CSS

Only One Ccss File as been used "style.css" with well commented

If you would like to edit a specific section of the site, simply find the appropriate label in the CSS file, and then scroll down until you find the appropriate style that needs to be edited.

Some Pre Define Classes

.clearfix: when two elements are floated left and right then cleafix is used above it

.floatleft : for floating element to left

.floatright: for floating Elemeny to Right

---

----

## C) Images

All the images are present in this folder

---

-----

## D) PSD Files

I've included two psd's 1 psd and 2 psd containe slices:

Your can easly customize as per as your requirement, all the layers are grouped to its repectively

Example :

All the layer file are grouped

-----
